

Genesis OakTM

BY COACH HOUSE TIMBERS

A system of **ENGINEERED OAK** interior fit out components

New Beginnings,

Age Old Tradition.

What is Genesis Oak?

Genesis Oak is a system of **Engineered European Oak** (*Quercus robur*) profiles, supplied raw or pre-finished in our range of UV-cured polyurethane coatings.

GENESIS OAK™ FLOORING

Genesis Oak Flooring offers a range of **ENGINEERED TIMBER** products to complement any interior design theme and is specifically designed to address the need of fast installation in commercial projects, where time is of the essence.

The penetrative nature of Genesis Oak coating highlights the grain and maintains the natural timber texture, whilst providing a hard finish that is able to sustain day to day traffic.

Available in **190mm and 260mm widths**, our boards comprise of a 6mm European Oak wear layer above a 14mm cross-laminated hardwood ply base, giving them a sturdy **overall thickness of 20mm**. Genesis Oak boards can be fixed to any substrate and are profiled to tongue-and-groove and end-matched for easier and faster installation. The pre-finished options do not require sanding or finishing once laid.

Genesis Oak has lifetime service in mind by design. Unlike other veneers and engineered products, our **thicker 6mm European Oak** lamina allows for re-sanding and coating many times over.

There's no need to replace the whole floor, simply sand back the coating and re-apply, or apply your new option!

MOISTURE CONTROL

Genesis Oak products are strictly monitored for moisture content for optimum performance, ticketed and certified at 10-11% M.C.

INSTALLATION

Genesis Oak Flooring was designed for easy and fast installation. Its tongue and groove profile is able to be fixed to most substrates, such as concrete, timber or composite. End-matching allows for the material to be joined randomly, therefore saving waste and assisting in easier installation.

ASSOCIATED PRODUCTS

Genesis Oak does not only cover the flooring side of your interior. Ask about our associated products such as stair nosings and fillet moulds.

Genesis Oak Flooring Benefits

-  **End-matched** for low waste
-  Coated with **UV cured, commercial-grade oils** for maximum protection
-  **Coated material:** 190 x 20/6mm

-  **Available** pre-coated or raw
-  **6mm European Oak** wear layer for longevity/maximum service life
-  **14mm cross-laminated hardwood ply** base for product stability

ABOUT OUR PRODUCT

Our engineered oak product has been carefully researched to achieve the highest standard in every respect.

THE TIMBER is sourced sustainably and responsibly.

THE COATING PROCESS: Before agreeing upon a suitable coating, your Genesis product had a design objective of NIL or LOW V.O.C. (Volatile Organic Compound) without sacrificing easy application and durability and high wear factor. Many systems were trialled before the final result was defined.

The Genesis Oak coating offers a number of advantages above those already mentioned.

 **Low V.O.C., solvent free**

 **Scent free**

 **Maintains natural feel of timber**

 **Non-flammable, class B2**

 **UV stable - colour does not fade**

 **Suitable for children's toys and direct food contact (once fully dry)**

 **Economical application (<20g/m²)**

 **Maintenance & repair made easy**

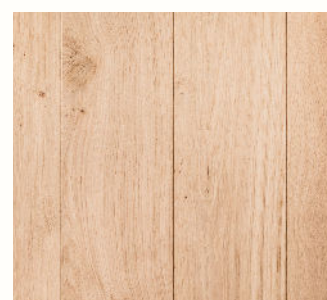

Naturale Florence
